# Embedded PCs

Integrate efficiency and reliability

Boosting efficiency in compact spaces, Transcend offers M.2 2242/2230, mSATA, and Half-Slim form factors for embedded systems, enhancing performance with increased speed, low latency, and high durability—crucial for sustained and reliable operations in challenging environments.

High Adaptability

Wide-Temp/Extended-Temp technology ensures utmost reliability under extreme temperatures.

Accurate Execution

LDPC ECC algorithms for handling intensive workloads.

Product Longevity

Fixed BOM & product lifecycle management (PLM) for long-term supply.
